SOME OF THE INDUSTRIAL CASTINGS

The material specifications handled by us include all grades of Indian / International Standards.

Production facilities at “Bhaskar Alloy Castings” include an Induction furnace, Heat Treatment Furnace, Air Compressor, Grinding Machines, High Tech Laboratory, and various Testing equipment such as Spectrometer, Hardness testing, , etc. so that we can cast the most complexly configured component as per customer requirement. The use of these new techniques of production helps us to achieve a high rate of Versatility and in turn, allows our customers to consolidate patterns at a single source for consistently high quality and competitiveness.
